

LAS CRUCES AND  
MESILLA VALLEYLAS CRUCES GRANTS  
STREET RAILWAY  
FRANCHISEA Car Line to Agricultural  
College Is to Be Con-  
structed.

Las Cruces, N. M., June 11.—The franchise asked of the town board by Samuel T. Reynolds and Isidoro Armijo for a right-of-way through the streets of Las Cruces for a narrow gauge street railway was granted Friday at a special meeting. The conditions of the franchise make it obligatory on the promoters of the road to begin actual construction work not later than 60 days from the time the franchise goes into effect, which is 60 days after the second publication of the ordinance, and further that the road is to be completed and in operation within eight months from that date.

The right-of-way granted begins at the juncture of Court street and Mesilla road; thence east to West street; thence south to Amador street; thence west to Mesilla road; thence southerly to and south on the Mesilla Park road parallel with the A. T. & S. F. right-of-way to the intersection of the road from the intersection of El Paso or El Camino Real, south to the town limits. Mr. Reynolds was in the city in conference with Mr. Armijo Friday. They state they will meet the requirements of the franchise.

STUDY HABITS OF  
THE CODLING MOTHNew Mexico Agricultural  
College Conducts Ex-  
periments.

Agricultural College, N. M., June 11.—The latest work of the United States experiment station at the Agricultural College has been with the codling moth. The investigation corroborates the observation made by professor Fabian Garcia that the larvae of the codling moth in the Mesilla valley enters the side of the fruit in most cases, instead of at the calyx or core.

This result is something out of the ordinary as other experiment stations find that at least 75 percent of the larvae enters through the core to get the seed which serves as food. This important work is to be carried on by J. W. Rigney, an assistant, during the summer. He will work in the pear orchard on the college farm and in the apple orchard of H. D. Bowman, adjacent to the farm.

The information sought in regard to the codling moth at this time is the length of its life, cycle and the habits of the animal during the larval stage. The experiments this year at the college will be extensive and expensive. Apparatus of all description has been secured in order that the moth may be captured in each of its three stages, that of the larvae, the pupal and of the moth itself. This is to the end that the cycle life of each may be thoroughly studied.

At the present time, arsenate of lead spray is being applied to the fruit as this reaches and destroys the moth in its first stage. Other experiments of an interesting nature that are now being conducted are those in over a hundred kinds of wheat and that in cotton. It is not generally known that any cotton has been planted, but the number of southern people in this section the result will be eagerly inquired for.

Herald Readers.

Has the veil of mystery that has so long shrouded the ancient sciences been raised at last? Can it be that a system has been perfected that reveals with reasonable accuracy the character and disposition of an individual, and so outlines the life as to assist in avoiding errors and taking advantage of opportunities?

Roxroy, a man who has for 29 years been delving into the mysteries of the occult, making a scientific study of the various methods of reading the lives of people, seems to have reached a higher round in the ladder of fame than his predecessors. Letters are pouring into his office from all parts of the world telling of the benefits derived from his advice. Many of his patrons look upon him as a man gifted with some strange, mysterious power, but he modestly asserts that what he accomplishes is due alone to an understanding of natural laws.

He is a man of kindly feeling toward humanity, and his manner and tone immediately impress one with his sincere belief in his work. A huge stack of grateful letters from people who have received readings from him adds to other convincing proof as to his ability. Even Astrologers and Palmists admit that his system surpasses anything yet introduced.

The Rev. G. C. H. Hasskari, Ph. D., Pastor of St. Paul's Evangelical Lutheran church, in a letter to Prof. Roxroy, says: "You are certainly the greatest specialist and master of your profession. Everyone consulting you will marvel at the correctness of your detailed personal readings and advice. The most skeptical will consult you again and again after corresponding with you once."

If you wish to take advantage of Roxroy's generous offer and obtain a free reading, send your date, month and year of birth, state whether (Mr., Mrs. or Miss) and also copy the following verse in your own handwriting:

I have heard of your power  
To read people's lives  
And would ask what for me  
You have to advise?

Be sure to give your correct name, birth date and address and write plainly. Send your letter to ROXROY, Dept. 43 D, No. 1774 Kensington High Street London, W. England. If you wish, you may inclose 10 cents (U. S. stamps) to pay postage, clerical work, etc. Do not inclose coins or silver in letters.

Note—Under the new Postal regulations you can send a sealed letter to England for only 2 cents postage.

LAS CRUCES TOWN  
BOARD HAS MEETINGTax Levy Reduced and Gen-  
eral Tax Levy Placed  
at 10 Mills.

Las Cruces, N. M., June 11.—At the meeting of the board of town trustees, attended by the full membership, P. Morley and W. P. Jacoby, appeared at the last regular meeting to investigate the complaint of C. S. Pedregon as to the invasion of East Las Cruces avenue by a fence, recommended that the fence be removed to its former position, which was adopted.

At the suggestion of the chairman, on motion of Mr. Jacoby, the tax levy for interest on bonded indebtedness for 1910 was reduced 2 1/2 mills, the levy for 1910 for such purpose being 3 1/2 mills. The levy for general purposes was fixed at 10 mills.

Messrs. Lohman and the heirs of Don Martin Amador having agreed to the widening and straightening of Amador street for one block west of the Las Cruces aqueduct, and likewise to construct sidewalks on both sides of said street in said block, the chairman, R. L. Young, was authorized to remove and reset the fence along the Amador property.

The application of S. T. Reynolds and Isidoro Armijo for a franchise for the construction and operation of an electric street railway, was granted for a period of five years.

Chairman Young was authorized to have the flow of water in a well on the mesa tested as to the flow of water and also subjected to chemical analysis. The chairman was further authorized to furnish or provide the sheriff a vehicle for the hauling of debris collected from the streets.

CROPS IN GOOD CONDITION  
AT AGRICULTURAL COLLEGE

Farmers Planting Cane; 800 Ton Alfalfa Hay Barn Completed; Speculators Are Buying Crop at Low Price.

Agricultural College, N. M., June 11.—Plenty of water and favorable weather have combined to create good crop conditions. The price of hay is rapidly going up. A full crop is in sight and also a market. The fruit outlook is the best for a number of years. Some attention is being given by a few of the farmers to the planting of sorghum. Corn has also been planted to a larger extent than for some years. The new hay barn of W. N. Hager has a capacity of 800 tons. It is one of the many which have been recently built. It is of adobe with a sheet iron roof and very substantial. Mr. Hager is one of the most extensive dealers in alfalfa in the valley. At the present price all of the men who are in the alfalfa business are buying extensively. A representative of a large company in the middle west is in the valley at present looking over the situation with a view to erecting an alfalfa mill. William Graves, station agent for

BERINO CROPS ARE  
IN GOOD CONDITION

Wheat Harvest Starts; Sheaf of Alfalfa Reaches Height of Five Feet, Six Inches; New Dance Hall.

Berino, N. M., June 11.—Crop conditions are excellent, and although the low stage of the river has slightly shortened the water supply, the second cutting of alfalfa promises to be fully up to the average with a stiff demand from east Texas and southern states. Wheat harvesting begins next week on some well advanced fields and will be in full blast by June 25. The acreage in corn and beans is fully up to the average.

J. C. Rishabarger has bought 80 acres of land from H. Wilken, of California. Mr. Rishabarger has refused a \$400 profit twice since buying.

C. C. Belk and Jack Bawanda, of Houston, Tex., are in the valley looking over their land holdings here. The Lucern Farm company has carefully preserved a sheaf of alfalfa measuring five feet, six inches, for exhibit at the El Paso fair this fall and at the Irrigation Congress.

Carl Price, having completed his new store building at Berino station, has turned it over to the dancers for Friday and Saturday nights.

LORETTO ACADEMY WILL  
CLOSE AT LAS CRUCES

Las Cruces, N. M., June 11.—The closing exercises of Loretto academy will be held Tuesday night, marking the

14th year's work done in this school. The program is of exceptional merit, being composed of songs, instrumental numbers, essays and recitations. The little girls' entertainment, in which 60 little girls will take part, will be the closing number. The art display will be on display Monday. It includes china paintings, oils and water colors.

CENSUS ROLLS HELD OPEN  
FOR LAS CRUCES CITIZENS

Las Cruces, N. M., June 11.—Supervisor of census Paul A. F. Walter of Santa Fe, is holding the Las Cruces district open and writes that he will deem it a favor if any person who has been missed or knows of any one missed, will report the fact to him and blanks will be furnished and the rolls completed.

Mr. Carroll of Anthony has been instructed to canvass the Berino district and is at work now.

THRESHER ORDERED FOR  
LAS CRUCES WHEAT CROP

Las Cruces, N. M., June 11.—The Rouault & Son have ordered for R. E. French a complete steam threshing outfit which will arrive in time to take care of the bumper wheat crop in the vicinity of Las Cruces this season. The reports on the growing crop becomes more flattering every day and the yield is expected to be something enormous.

## LAS CRUCES DAILY RECORD.
